

# Aman Sigroha

New Delhi, India | +91 9911864871 | amansigrohawork@gmail.com | LinkedIn | GitHub | Portfolio

## Education

### Vivekananda Institute of Professional Studies – Technical Campus

Expected June 2027

B.Tech in Artificial Intelligence and Data Science | CGPA: **7.8/10** | New Delhi, India

## Technical Skills

**Languages:** JavaScript, TypeScript, Python, Java, SQL, HTML5, CSS3

**Frontend:** React.js, Next.js, Tailwind CSS

**Backend:** Node.js, Express.js, FastAPI, REST APIs, WebSockets

**Databases:** MongoDB, PostgreSQL, MySQL

**Tools:** Git, GitHub, Docker, Postman, Railway, Vercel, AWS

## Experience

### Freelance Full Stack ML Developer – Identity Verification System

November 2025 – December 2025

*Remote Contract*

- Designed and deployed KYC verification APIs integrating OCR, liveness detection, and facial matching using **FastAPI**.
- Scaled concurrent verification workflows supporting **10+ simultaneous user requests** with asynchronous processing.
- Maintained **99%+ service uptime** through production deployment, monitoring, and backend optimization on Railway.

### Full Stack Developer Intern – Unusual Consultant

September 2025 – October 2025

*Remote Internship*

- Delivered authentication, dashboard, profile, and AI-driven MVP features using **Next.js, FastAPI, and PostgreSQL**.
- Increased API response efficiency by **35%** through backend caching, optimized queries, and improved data flow.

### Freelance Backend Developer – Yacht Charter Search Platform

August 2025 – August 2025

*Remote Contract*

- Engineered scalable REST APIs integrating **38+ advanced yacht search filters** and external Nausys API services.
- Improved backend throughput by **40%** using aggregation pipelines, asynchronous I/O, and optimized query handling.
- Structured high-performance backend workflows for large-scale yacht search and booking operations.

### Web Development Intern – BGM Sons Enterprise

June 2025 – July 2025

*Hybrid, New Delhi*

- Revamped React.js application architecture reducing average load time by **28%** across production workflows.
- Refactored frontend state management improving component efficiency, responsiveness, and UI scalability by **25%**.
- Assisted in production deployment, debugging, and frontend optimization for client-facing web applications.

## Projects

### Project Veil – Autonomous Parallel Desktop Copilot

**GitHub**

- Built a dual-workspace AI desktop system where a local LLM controls a dedicated secondary desktop to execute multi-step browser and application workflows without interrupting the user's active workspace.
- Designed a live picture-in-picture control panel with real-time desktop streaming and natural language commands, enabling users to monitor, redirect, or interrupt AI actions at any time.
- Engineered an event-driven execution engine supporting concurrent task orchestration, browser automation, modular tool execution, and resilient state management for long-running AI workflows.

## Achievements

- Maintained a **5-star rating** on Upwork with a **100% job success score**.
- Successfully completed **8 freelance projects** across multiple platforms (Upwork, direct contracts).
